

THE TRANSFORMATION **EDGE**

A change is inevitable

A2 - Architectural Threshold

APPROVED MASTER SYMBOL

MEANING

Two planes define the moment of crossing; the protected seam is the threshold.

CHARACTER

Open, assured and architectural without becoming severe or institutional.

RECOGNITION

Negative space survives at 16 px and remains independent of colour.

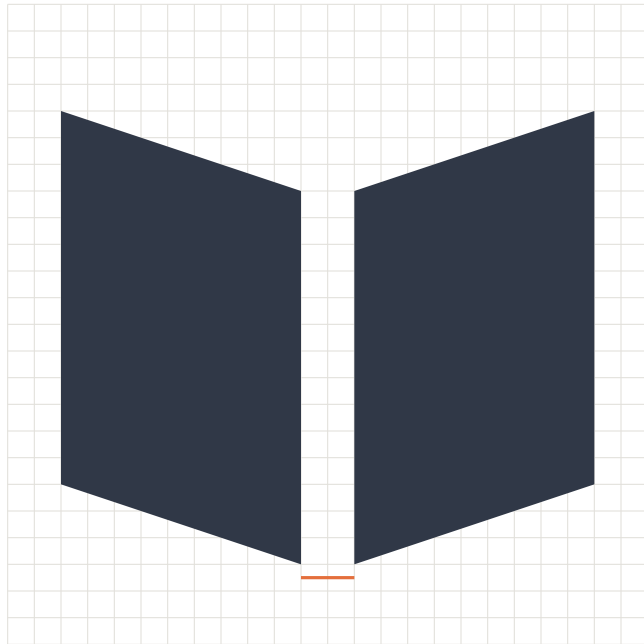

ACCENT VERDICT

Keep Ember, but outside the symbol and below 5% of any composition.

The accent adds warmth and energy without becoming the identity itself.

One grid, one seam, two planes

2-UNIT PROTECTED SEAM

GRID

24 x 24 units

CLEAR SPACE

6 units around every edge

PLANES

Solid fills only

SEAM

Never narrow, close or decorate

ROTATION

Always upright

OUTLINE

Never stroke the planes

A compact hierarchy for every format

IMAGE FIELD

Use the reversed mark only where the background remains consistently dark. On variable photography, introduce a Deep Slate field or reposition the mark; never rely on a shadow or outline.

The symbol carries the identity alone

FAVICON

Transparent background. Deep Slate symbol. No accent at 16-48 px.

APP ICON

Ember appears as an environmental detail, separate from the symbol.

SOCIAL AVATAR

Keep the mark centred with generous surrounding space; omit the wordmark.

One construction grid; differentiation below the name

Usage README

Accent conclusion: retained, controlled and non-structural

Ember improves warmth in small doses. It has therefore been retained as a supporting system colour while remaining absent from the master symbol.
